

Culver's Dynamic Campus

You will note many changes to the campus since your last reunion. We look forward to you enjoying these enhancements to the Culver campus upon your return in the future.

Construction is nearing completion on **Roberts Barrack** and is well under way on **Lauridsen Barrack**. Roberts Barrack is between North/East Barracks and Fleet Gymnasium. Lauridsen Barrack is between the Lay Dining Center and the Music & Art Building.

The **Schrage Leadership Center** is also nearing completion. When it is finished, there will be new spaces for classes large and small and is a transformative enhancement to Culver's leadership program. It is situated on the west end of campus, on the former site of the Culver Motels.

Construction has begun on a new stadium at **Oliver Field** and **Mendelson Track**. This will be a welcome addition to our athletic programs, with concession stands, locker rooms, and enclosed rooms for special events.

The **Paul Pigott Center for Advanced Technology and Design** is Culver's new innovation space for design and advanced technology. Opened in October 2017, the Pigott Center invites students and faculty members to design, collaborate, and prototype concepts during the academic day as well as during CQ. Designed with movable furniture, white boards, Surface Hubs, glass walls, and wireless speakers, the open and adaptable floorplan makes thinking easily visible. In the hard fabrication space, students and faculty use 3D printers, a laser engraver, Raspberry Pis, Little Bits, and various other pieces of technology to enhance their learning processes through projects.

We added a new **Nature Pavilion** at Woodcraft Camp in 2018. Woodcraft offers 10 nature classes each summer, and this new space will offer an excellent space to learn about Nature (aside from actual Nature, of course).

To meet the health needs of so many young people, the **Waterfield Health Center** opened at Woodcraft Camp in 2018. The new facility greatly expands the space and equipment available for medical staff to treat the health needs of campers quickly and effectively in comfort and privacy.

Memorial Chapel has undergone a significant restoration and renovation. Roof repairs, storm window installation, tuck pointing and HVAC installation helps preserve the Chapel from the ravages of the elements it is especially subject to because of its grand and significant position overlooking Culver's campus.

Harbor Dormitory opened in 2016 in the **Julius W. Hegeler II Wing** at the south end of **Argonne Dormitory** to begin consolidating CGA and Upper School living space, allowing for more girls' residences on the main campus. This is part of a longer-term plan to consolidate and improve living spaces for CSSC, CGA and CMA students.

Culver's Golf Course has been restored to its original, historic design. Not only is the course open for play, but construction has been completed on a new **Golf House**. The course was designed in the 1920s by renowned golf course architects William Langford and Theodore Moreau. Culver's course is the only example of their nine-hole courses that remains true to their original vision and design. The course was renovated to restore its original layout and make it a top-notch teaching course for Culver golfers.

The Huffington Library has been significantly renovated and improved, with a new entrance at ground level that improves access to the building but enhances the grand façade of one of the jewels of the academic campus, as well as upgrades to the interior to improve the study environment.

New cabins have been built at **Woodcraft Camp**. Increases in the number of girls at camp have swelled the ranks of the Butterflies and Cardinals, making the new cabins necessary.

The **new Julius W. Hegeler II Foundation Scouting Headquarters** is also ready for Woodcraft campers.

A new **Leadership & Character Development Arena** has been built next to the **Vaughn Equestrian Center**. In addition to providing paddock space, it is used for classroom space in the summer. Also among improvements in the Horsemanship Department, a new fence has been installed around the **CSM John W. "Sarge" Hudson Black Horse Troop Pasture** at State Roads 10 and 17.

Culver has a dynamic and constantly improving campus. If you are interested in hearing more about any of these projects, please contact Holly Johnson, Chief Advancement Officer, at (574) 842-8067 or Holly.Johnson@culver.org.
